React-Native & Next JS Application Developer

University of British Columbia | May 2020 - present

Social Media Poetry App

Demo: PhoneMeProject.com

- Initially worked on a team and developed much of the frontend in React-Native.
- Took ownership of the project and migrated from a Fastify and PostgreSQL backend to Firebase.
- Re-designed and implemented the project to reduce costs from \$200 to nearly \$0.
- Vastly improved performance and enabled the app to scale effectively during events.
- The app now lives at www.phonemeproject.com and has over 800 users.

ChatPlanAI

Founder | 2024 - present

Mobile and web application for chat-based planning and collaboration.

Current Features:

- Cross-platform mobile and web app built with Expo, Convex, and tailwind.
- Chat with your customers and generate a plan from it via a Large Language Model (LLM).
- Add and invite customers to your project planning chat with magic links.
- Push notification system for real-time updates.
- Editable AI-generated plans and summaries.

Coming Soon:

- Coming to app stores.
- Real-time collaborative editing.
- Time machine feature for viewing edit history.
- Payment integration.
- Customizable summary generation with user-provided prompts.
- AI-powered assistance for planning.
